Learning Journeys and Systems Thinking (*Patrick Godfrey*)

- Delegates discussion

Morning Tea/Coffee

Leading Change (*Jim Bentley*)

- Delegate discussion

Intergenerational Thinking (*Cynthia Mitchell*)

- Delegates discussion
- Outbrief of actions generated

Closing remarks (*David Singleton*)

Wrap up

Lunch

Introduction suggestions (about 1 min ea)

Who are you? e.g.

Name, affiliation/organisation and position

Why are you here? e.g.

How does your **role** relate to infrastructure (eg planning, design, financing,..)?

How does **systems / systemic thinking** manifest now in your organisation?

Something fun? e.g.

Where did you get your coffee/tea this morning? And was it any good?

Guided Discussion

What are the most pressing systems challenges in your domain?

Guided Discussion

How effective is your industry in responding to these challenges?

What can you see happening now, that is creating space for change towards a system approach, i.e., towards addressing these challenges?

Guided Discussion

How might these ideas and practices be useful in your context ?
(viewing what you've seen as a play book, rather than a rule book)

Guided Discussion

What are the next steps in your domain?

And across domains?

How does it make sense for your domain to link with / learn with other domains?

What will you do next?

What ought this group do next?
